EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the attorney of record, Andrew Chew, on June 7, 2006.

The application has been amended as follows:

With regard to claim 6, line 9, the phrase -- of said counter-nut -- has been inserted following the phrase, "a relative rotation".

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record disclose an apparatus for separating hard components from a grinder comprising a grid means, a separating cutter, and a collecting tube. However, the prior art of record does not disclose or render obvious all of the details of the limitations of independent claim and, in particular, an apparatus for separating hard components from a grinder comprising a grid means wherein the gap is adjusted by a counter-nut in accordance with the means provided in the specification as invoked by the "means-plus-function" in the claim.

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure. It includes Leser (US 5,405,095).
